

## Adjustable precision spirit level

Art.-Nr. 6080/160/KK - 6084/500/KK

Adjustable precision spirit level e.g. for absolute and relative measurements in the approved format

### FEATURES

Easy adjustment by:

- Stable, backlash-free mechanic
- Large adjustment range
- Exact fine adjustment possible
- Easy, intuitive operation
- End position protection
- Tension-free storage
- Display of longitudinal and transverse inclination
- Pre-adjusted zero position
- Side view of the vial
- Full thermal protection
- Allen key KW3 included
- Service in Germany
- Made in Germany

## With adjustment device

The adjustable precision spirit level from Roeckle Neigungsmesstechnik e.K., 73770 Denkendorf complements the range of approved precision spirit levels with a permanently installed longitudinal vial. By simply and intuitively setting the desired incline, it is ideally suited e.g. when relative measurements are required in addition to measurements with the absolute value. The adjustment device is characterized by an exact setting option over a large measuring range.

### TECHNICAL SPECIFICATIONS

- Sensitivity: 0.3 to 0.01 mm/m depending on the model
- Length: 160, 200, 250, 300, 500 mm
- Adjustment range: +/- 5 turns corresponding to +/- 4.0 mm/m
- Width / Height: 42-44 x 44-48 mm
- Weight: 1,03 - 3,97 kg
- Fine grinding surface flatness max. 5 µm
- Manufactured according to DIN 877 and DIN 2276-1

Simple setting of a relative zero point with the adjustment device
